

Alagunandhini M

Software Developer

6369645391 | alagunadhini@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Software Developer experienced in building full-stack and AI-powered applications using React.js, Node.js, Express.js, MongoDB, and LLM APIs. Skilled in developing real-world project and building responsive and user-focused applications. Quick to learn new technologies and adapt them to practical development needs. Interested in software development and solving practical problems through technology.

Technical Skills

Languages: Java, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS

Backend/Database: Node.js, Express.js, REST APIs, MongoDB, SQL

AI / LLM: Google Gemini, Groq, LLaMA, LLM Evaluation, AI API Integration

Tools: Git, GitHub, VS Code, Postman

Projects

MZPLACENEXT – AI-Powered Mock Interview Platform

College Project | Demo Video

React, Node.js, Express.js, SQL, Gemini AI, Deepgram

- Built a full-stack MERN platform where resumes are parsed by Gemini AI to generate questions across four rounds – resume screening, technical, system design & architecture, and behavioral.
- Implemented voice-based answering with Deepgram Speech-to-Text, enabling students to practice speaking answers aloud and receive structured feedback; used Gemini AI to evaluate transcripts and generate scores and personalized feedback.
- Managed LLM API usage in production by tracking input/output token consumption, RPM, RPD, and TPM limits; load-tested the platform with 20 concurrent students to evaluate rate limiting, API reliability, and performance under simultaneous multi-user load.

Pinky AI – Resume-Based Interview Practice Platform

GitHub | Live Demo

React, Tailwind CSS, Express.js, MongoDB, Groq API, Deepgram API

- Built a voice-based AI platform generating resume-specific interview questions; integrated Groq API for question generation with answers and AI evaluation, and Deepgram Speech-to-Text for real-time interaction.
- Developed full-stack features with secure API communication and a responsive user interface.

CVortex – AI Resume Analyzer and Resume Builder

GitHub | Live Demo

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, LLAMA API

- Collaborated in a 13-member nationwide team to build an open-source AI career acceleration platform.
- Contributed to the AI Resume Analyzer by integrating backend AI analysis, ATS scoring, and personalized resume feedback.

Experience

Zylo Mobility – Corporate Transport & Fleet Management Website

Live Site

Freelance/Client Project – React.js, Tailwind CSS, Express.js, Resend API, Google Sheets API

- Developed and deployed a production website for a mobility and transport solutions company.
- Built responsive frontend interfaces with modern UI/UX practices for better user engagement.
- Implemented secure backend integration including contact form handling, email services, and Google Sheets data storage.

Coding Profiles

LeetCode: Solved 400+ problems, max rating 1506, ranked in the top 42.3% of users

GeeksforGeeks: Solved 300+ problems, scored 630, Institutional Rank 3

Skillrack: Practiced 600+ problems, strengthening programming fundamentals and logical thinking

Education

Mount Zion College of Engineering and Technology, Pudukkottai

Bachelor of Engineering, Computer Science Engineering

2023 – 2027

CGPA: 8.08 (Up to 6th Semester)
