

Alagunandhini M

Aspiring GenAI Engineer | Data Engineer | 6369645391 | alagunadhini@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Computer Science Engineering student with hands-on experience building AI-powered applications using LLM APIs, prompt engineering, REST APIs, Python, SQL, and full-stack technologies. Experienced in integrating Gemini, Groq, and LLaMA APIs for question generation, AI evaluation, resume analysis, and personalized feedback. Strong foundation in data processing, API integration, problem solving, and Generative AI, with a growing focus on RAG, embeddings, semantic search, and data engineering.

Technical Skills

Programming: Python, Java, JavaScript

Frontend: HTML, CSS, React Js, Tailwind CSS

APIs & Backend: REST APIs, Node.js, Express.js, API Integration

AI Technologies: Google Gemini, Groq API, LLaMA, Deepgram Speech-to-Text

Database: SQL, MongoDB, Data Cleaning, Data Transformation, ETL/ELT Fundamentals, CSV/JSON Processing

Generative AI: LLMs, Prompt Engineering, LLM API Integration, AI Response Evaluation, Token Usage, Context Windows, RAG Fundamentals, Embeddings, Semantic Search

Tools: Git, GitHub, VS Code, Postman

Projects

AI Document Intelligence & RAG Assistant

In Progress

Python, SQL, REST APIs, LLM API, Embeddings, ChromaDB, RAG

- Developing a document-based question-answering application using Retrieval-Augmented Generation (RAG) to provide context-aware answers from uploaded documents.
- Building a Python data pipeline to extract, clean, and chunk document content before generating embeddings for semantic retrieval.
- Integrating ChromaDB for vector storage and semantic similarity search, with an LLM API to generate grounded responses from retrieved context.

MZPLACENEXT – AI-Powered Mock Interview Platform

College Project

React, Node.js, Express.js, SQL, Gemini AI, Deepgram

- Built an AI-powered interview platform using Gemini AI to analyze resumes and generate personalized questions across technical, system design, and behavioral rounds.
- Designed prompts for question generation, transcript evaluation, scoring, and personalized feedback using LLM APIs.
- Integrated Deepgram Speech-to-Text and REST APIs for end-to-end voice interview and AI evaluation workflows.
- Monitored LLM token usage, RPM, RPD, and TPM limits and load-tested the platform with 20 concurrent students for API reliability.

CVortex – AI Resume Analyzer and Resume Builder

GitHub | Live Demo

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, LLaMA API

- Collaborated in a 13-member nationwide team to build an open-source AI career platform and contributed to its AI Resume Analyzer.
- Integrated LLaMA-based analysis for ATS scoring, resume evaluation, and personalized improvement recommendations through backend API workflows.

Experience

Zylo Mobility – Corporate Transport & Fleet Management Website

Live Site

Freelance/Client Project – React.js, Tailwind CSS, Express.js, Resend API, Google Sheets API

- Developed and deployed a production website with responsive interfaces and backend services for reliable data processing.
- Implemented REST API integrations for contact form processing, email services, and Google Sheets-based data storage.

Certifications

Introduction to Generative AI

Coursera

Education

Mount Zion College of Engineering and Technology, Pudukkottai

2023 – 2027

Bachelor of Engineering, Computer Science Engineering

CGPA: 8.08 (Up to 6th Semester)
